

# An update for our neighbors in Southampton

We're modernizing the natural gas system to provide better service to the community.

In the coming weeks, National Grid contractor crews will be replacing over 2,400 feet of gas main and upgrading 47 individual customer service lines along Main Street from Hampton Rd to Jobs Ln, and along Cameron Street from Main Street to Pine Street. This project will provide a modernized natural gas system that is safer, cleaner and more resilient.

We anticipate the duration of the project to run from January through April.

Any service interruptions will be scheduled and of short duration. This project is coordinating with the Village of Southampton Department of Public Works.

## What you may expect during construction:

- All businesses will remain open throughout the entire project although parking may be impacted.
- Crews\* generally work between the hours of 8 am and 4 pm.
- Two-way traffic will be maintained at all times. However, motorists can expect lane shifts, merging traffic and delays. Traffic signs will be posted, and flaggers positioned where required.
- Final restoration will be completed at the end of the project.
- The safety of the public and our crews is our first priority. Please use caution in construction zones, and pay attention to traffic cones, cone bars and barricades.

National Grid is dedicated to helping local businesses succeed in today's competitive environment. We offer Energy Efficiency programs which help businesses improve performance, save money and contribute to a greener environment. For more information please visit [ngrid.com/trade](http://ngrid.com/trade).

National Grid provides matching grants for eligible costs related to the rehabilitation of vacant commercial, industrial, and mixed-use buildings. For more information and to learn about other Economic Development Grants, please visit [shovelready.com](http://shovelready.com).

Thank you for your patience.
